

#1 DREDGING Absorbent

LESS COST

Significantly reduced project cost on dredging jobs, coast to coast.

Z-Pellets

Absorb 6X their weight in freestanding liquid.

Absorb 8X-10X their weight in 60/40 liquid/solid mixture.

300% Better Performance than wood pellets.

Just 1 Ton of Z-Pellets treats 1,500 gallons of liquid versus 3 tons of wood pellets. That's 67% less material, 67% fewer truck loads, 67% less labor and fuel.

Liquid Suspension like no other! **Z-Pellets** hold all the moisture all the way to the landfill, no matter how far the drive or bumpy the road.

Environmentally Friendly without any occupational exposure limitations.

SUPER ABSORBENT

Absorbency that far exceeds Portland cement, fly ash, and high calcium lime, old-school methods of the past.

SAFE

Safe to handle, made from recycled materials, they provide an environmentally sound and sustainable solution.

CUTTING EDGE

Composed of a patented selection of recycled, organic, agricultural fibers, blended with a specific population range of polymers using our patented production process.
